in Love.

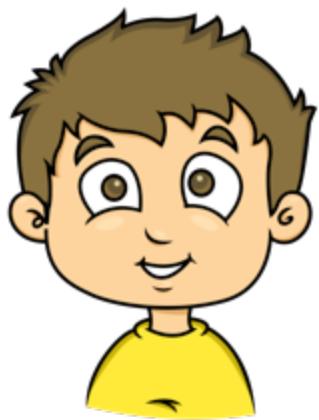

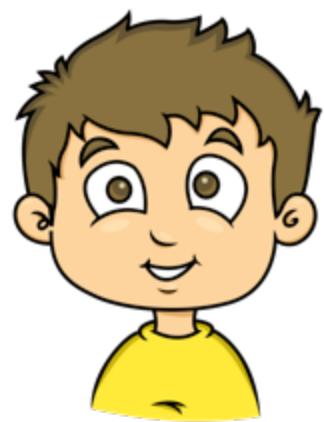

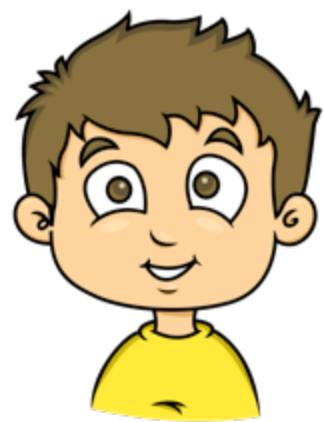

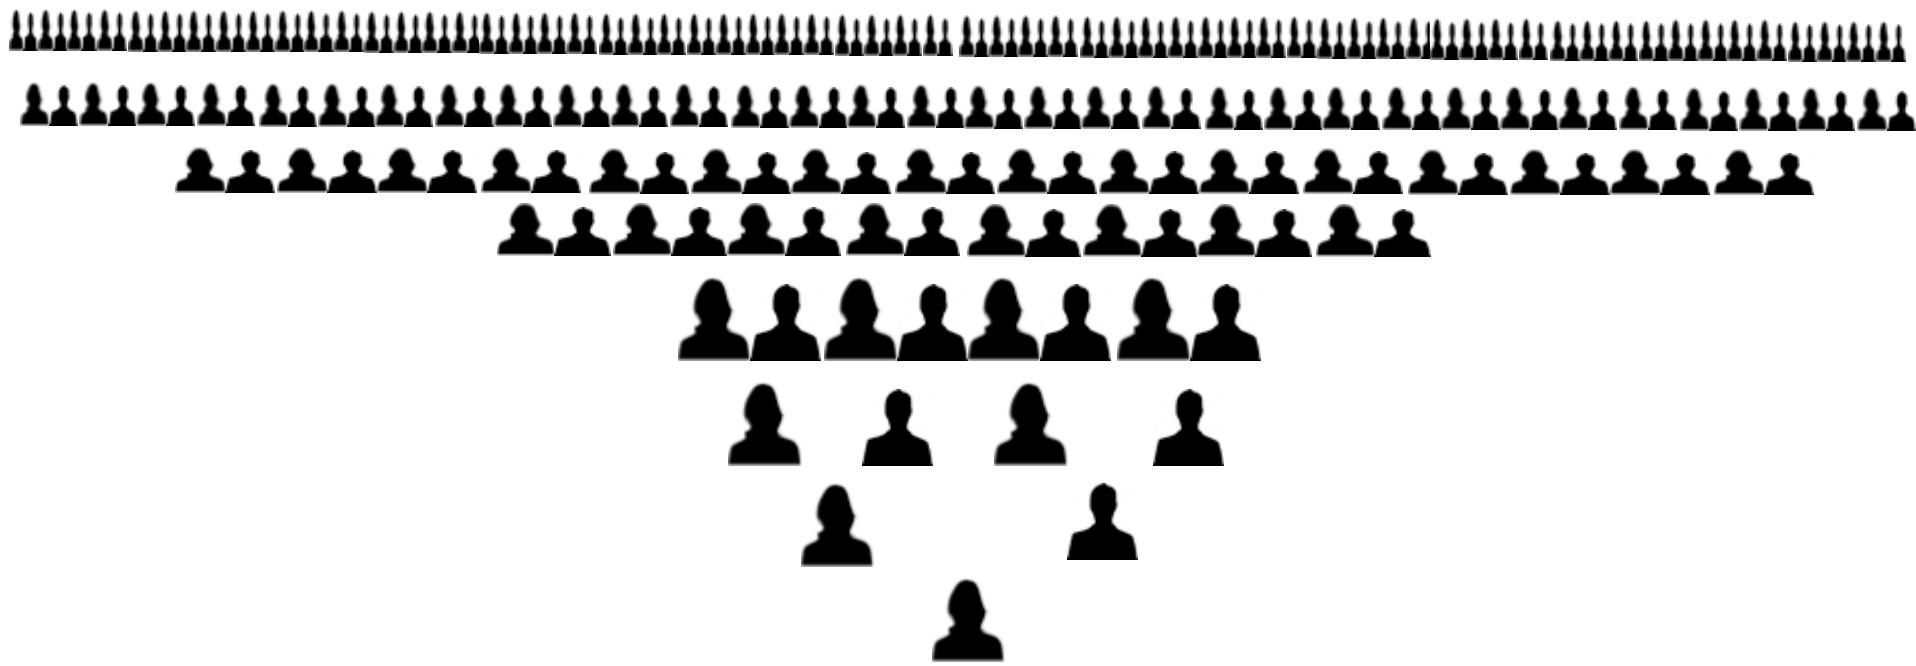

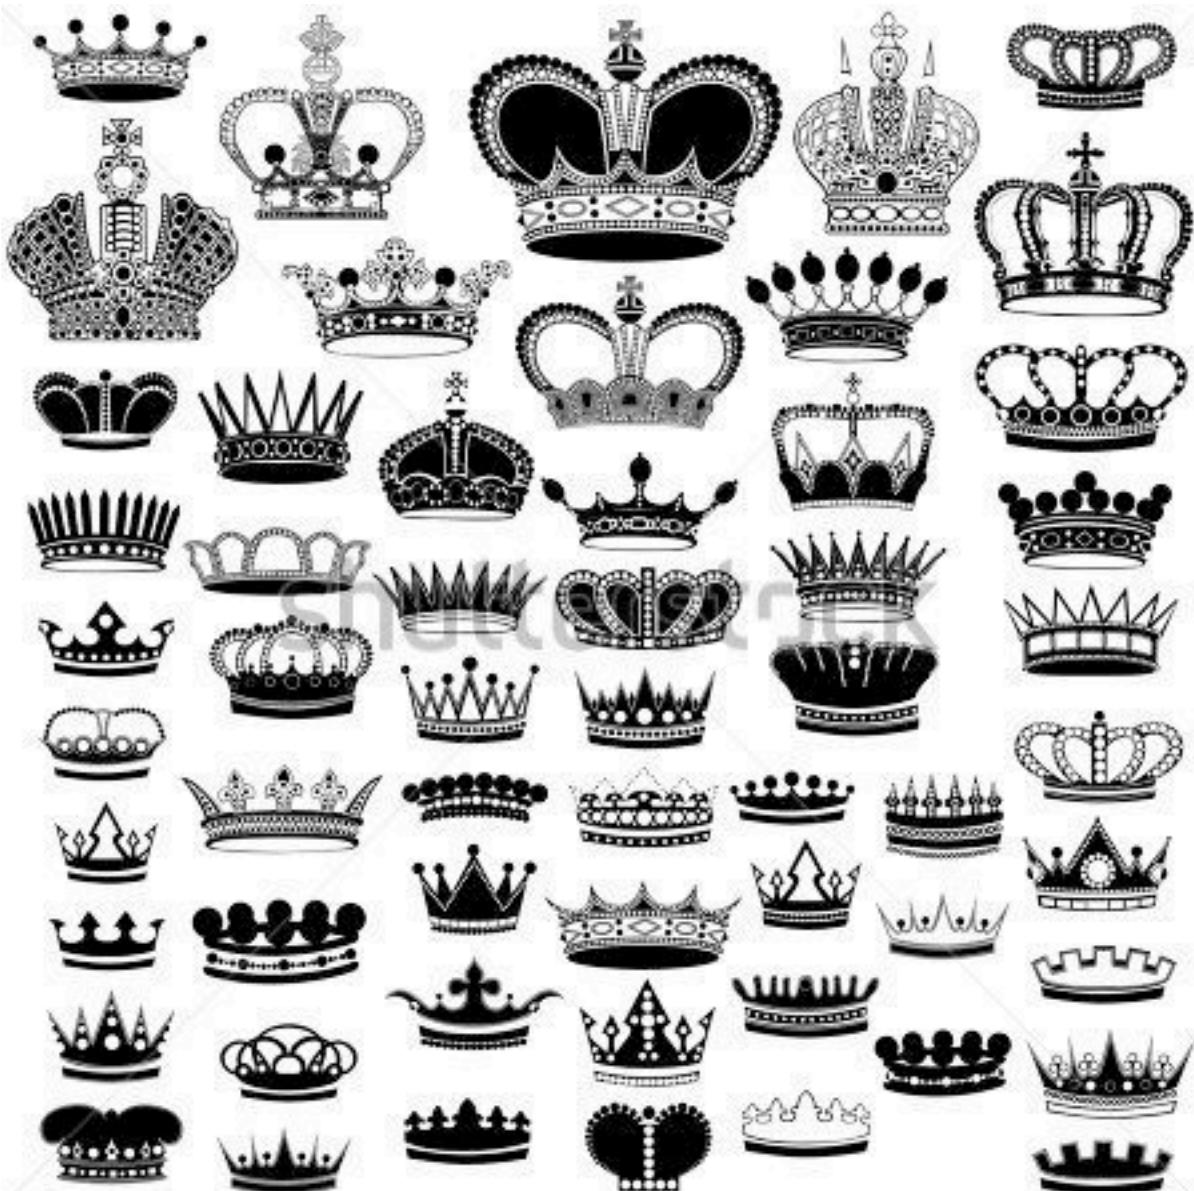

A portrait of a young King Charles V, depicted from the chest up. He has long, wavy brown hair and a full, dark beard. He wears a highly ornate golden crown with red gemstones and a matching robe with intricate gold embroidery. A large, ornate sword is visible on his left side. The background is dark with decorative gold fleur-de-lis symbols.

The idea that we all share ancestry is backed up by genetics:

The Geography of Recent Genetic Ancestry across Europe

Ralph and Coop , PLoS Biology 2013

<http://dx.doi.org/10.1371/journal.pbio.1001555>

- “Individuals from opposite ends of Europe are still expected to share millions of common genealogical ancestors over the last 1,000 years. ”
