

STATWORKS

University of
BRISTOL

- Statistical modelling and
inference for networks
University of Bristol, UK

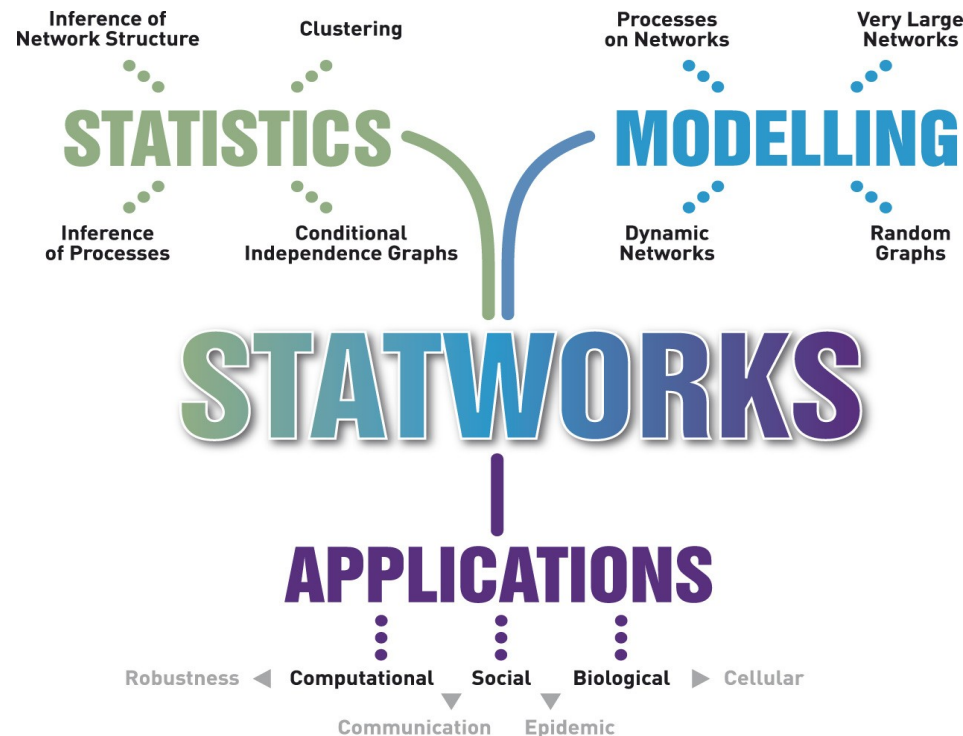

28th June - 1st July
Summer 2010

Free Registration

Workshop Agenda:

Networks play a role in a variety of applications. Whilst the concept of a network is central, there are differences in the meaning; the targets of inference; and the appropriate statistical methodology. The aim of this workshop is to bring together researchers with different backgrounds and approaches in order to explore commonalities and differences.

Contributed talks and posters available
Deadline for contributed talks 15th March 2010.

*For more info and to **apply online** see:*

The Venue:

Goldney Hall Orangery

Invited Speakers:

David Barber	UCL
Eric Kolaczyk	Boston U
Sanjeev Goyal	Cambridge
Sean Meyn	U Illinois
Brendan Murphy	UC Dublin
Stephane Robin	AgroParisTech
Michael Stumpf	Imperial
Stanley Wasserman	Indiana
Geoffrey West	Santa Fe
Eddie Wilson	U Bristol
